JOURNAL OF COMPUTATIONAL AND APPLIED MATHEMATICS

Author Index Volume 93 (1998)

Bai, Z.-Z., A class of asynchronous parallel nonlinear accelerated overrelaxation methods for the nonlinear complementarity problems 35– 44

Bai, Z.-Z. and **Y.-Y. Guang,** Asynchronous multisplitting two-stage iterations for systems of weakly nonlinear equations 13– 33

Boneh, S., see **Papanicolaou, V.G.** 95–105

Brown, J.C., see **Piana, M.** 75– 88

Dunster, T.M., Asymptotics of the eigenvalues of the rotating harmonic oscillator 45– 73

George, K., see **Mohanty, R.K.** 1– 12

Guang, Y.-Y., see **Bai, Z.-Z.** 13– 33

Jain, M.K., see **Mohanty, R.K.** 1– 12

Kokolakis, G.E., see **Papanicolaou, V.G.** 95–105

Mohanty, R.K., M.K. Jain and **K. George,** Fourth-order approximations at first time level, linear stability analysis and the numerical solution of multidimensional second-order nonlinear hyperbolic equations in polar coordinates 1– 12

Papanicolaou, V.G., G.E. Kokolakis and **S. Boneh,** Asymptotics for the random coupon collector problem 95–105

Piana, M. and **J.C. Brown,** Analytical and regularized solutions of the synchrotron integral equation 75– 88

Pu, D. and **J. Zhang,** Inexact generalized Newton methods for second order C-differentiable optimization 107–122

Sayas, F.-J., A generalized Euler–Maclaurin formula on triangles 89–93

Vermolen, F. and **K. Vuik,** A numerical method to compute the dissolution of second phases in ternary alloys 123–143

Vuik, K., see **Vermolen, F.** 123–143

Zhang, J., see **Pu, D.** 107–122
